

WYCOM
Simple, Seamless, Secure

Premier

Network READY!

Connect your Wycom factory-programmed Premier between hub/server and your printer you're ready to start printing checks from any workstation on your network!

Fast!Fast!Fast! How fast? 20 times faster than the benchmark Elite! With more memory for storing additional graphics and signatures, the Premier is in a league of its own.

Upgradeable! No more check stock inventory and security issues. If you are printing from a laser printer take advantage of our MICR Laser option and start printing checks from

BLANK safety paper today!

And, like all Wycom products, Premier offers a TRUE plug-and-play solution! Open platform and software independent, all programming is done at the factory. That means NO mechanical downtime, or hassle of learning new software applications. Just connect the Wycom between your computer and printers, turn the keys on the security system, and you're ready to securely automate your full check signing system.

Print from Multiple Computers!

The new, PREMIER is NETWORKABLE! Just connect your factory-programmed Premier between your server/hub and your printer and you're ready to start printing checks from any workstation on your network! That's from your computers to where the check needs to be!

Why Gamble with Your Checks?

Wycom keeps your valuable signatures off your computer and under lock and key! With our exclusive, dual-key security system, one Executive key activates the Wycom unit's signing mode, while the second key allows the specified user to select the desired account or check form to be printed.

The computer check signing features you want!

- Dot Matrix or Laser Compatible
- Custom Graphic Dollar Prefixes & Amounts **EXACTLY \$ 000 dol's 00 cts**
